

METAWELL
MIND-BODY WELLNESS TECHNOLOGIES

STRADIVARIUS
Augmented Massage

Defying the boundaries of Human Touch.

The Augmented Massage completely redesigns the massage experience, for both therapist and client. Real time sounds, created by the touch of the therapist's hands, turn this wellness experience into a unique and exceptional live performance.

The motion-to-sound medium, groundbreaking in the world of spa and wellness, is an unfiltered expression of human energy and the ultimate NOW experience. This innovative technology transforms every treatment into a bespoke and ever-changing interpretation of a musical score. The sound is alive, closely following the unique gestures of the therapist.

The Journey

A display screen guides the therapist throughout the experience, and built-in sensors analyze the position and speed of the therapist's movement in real time, to produce live sound in unison.

The Augmented Massage technology is set to enhance the experience of massage and elevate it to a whole new level. This innovation is the perfect fusion of human touch and Metawell's Mind-Body Wellness Technologies.

A deeper Dive.

At the forefront of innovation, Augmented Massage creates a symbiotic relationship between guest and therapist. Digital sensors follow the movement of the therapist, in synchronicity with music and soothing sounds delivered through multi-channel speakers.

The harmonious fusion of movement and sound takes the guest on a journey of 'augmented' relaxation, wellness, and stress relief. This unique alignment not only enhances their experience, but also allows the therapist to elevate their artistry.

Each gesture becomes a part of a musical masterpiece, thoughtfully and intuitively choreographed, setting the pulse and rhythm of an extraordinary and bespoke experience.

“As consultants we’re always needing to be ahead of everything. I just tried the Augmented Massage and it completely blew my mind. To be able to lie and have touch but with music that’s coordinated with it. with the vibration under the bed was incredible! I’m very excited to see that AI and all that type of technology with massage is coming together in such a beautiful way!”

Amy McDonald, Wellness Consultant

“I think this massage is mindblowing. That’s the first thing. It’s unbelievable how you can just be in unison with the music and with your client as you serenade and make them travel in the rainforest, at the beach... It’s just amazing!”

Nyasha Madyara – Senior Therapist Galgorm, Northern Ireland
